FINSENY project has participated in the last CEN, CENELEC and ETSI workshop in Brussels on 18th and 19th June 2012.

“The European Standards Organisations – CEN, CENELEC and ETSI – are engaged in an ongoing dialogue with partners around the world, in order to share knowledge and coordinate the development of standards that are needed to accelerate the deployment of the next generation of electricity networks, known as ‘Smart Grids’. The three organisations hosted an international meeting in Brussels on 18 and 19 June, with the participation of high-level delegations from Brazil, China, Japan, Korea and the USA.”

Results from Working Groups like WG SP or Reference Architecture had been presented to an international audience of high ranking representatives from regional, international or national standardization bodies, and FINSENY had been active in these WG's in order to achieve these results.
